

# EMC Security Consulting Services

## The Big Picture

- Accelerate business objectives and achieve a flexible and secure information infrastructure
- Develop an information risk strategy that optimizes business and technical requirements
- Simplify the cost and complexity of compliance

## Optimize risk management and accelerate business objectives

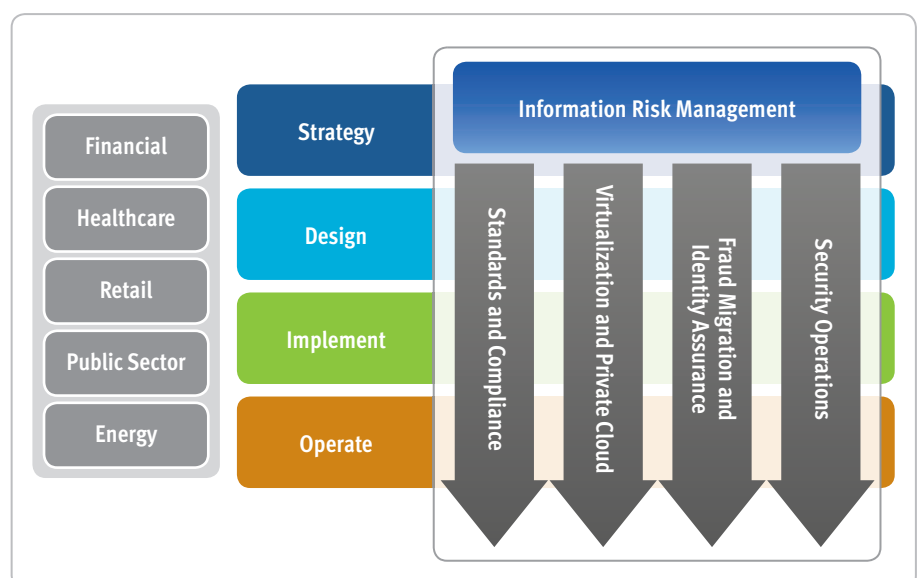

Today's business demands increased IT agility. Global business processes, growing compliance requirements, and heightened expectations for more flexible information technology are placing new demands on information security. Businesses not only require security to protect information from loss and misuse, but to foster innovation, reduce the complexity and cost of compliance, and provide security for emerging IT environments such as virtualization and private cloud.

### Overview

Your security organization faces significant challenges. You need to align changing business objectives with information security strategies, architectures, and operations, to assure that the right people have access to the right information over a trusted infrastructure. You also need to provide secure information infrastructure that is cost-effective and easy to manage.

Addressing these challenges and managing your information risks according to your business requirements demands a broad range of business and technology skills and capabilities.

EMC® Consulting's RSA® Security Practice helps you approach security with a business context that prioritizes security investments through a holistic approach—inclusive of technology infrastructure, organizational implications, and proactive best practices. We combine the security expertise of RSA, The Security Division of EMC, with EMC Consulting industry expertise and business, application, and infrastructure domain knowledge. Our comprehensive approach and capabilities help you with every stage of information security.

## Scope and approach

EMC Consulting's RSA Security Practice speeds innovation with the expertise to address security requirements in an industry and business context and protect and maximize the value of information, identities, and infrastructure.

We take a comprehensive approach to information risk management with services to address key business and technical requirements:

 <p>Standards &amp; Compliance</p>	<ul style="list-style-type: none"> <li>✓ Security Policy Development</li> <li>✓ Classification for Information Security</li> <li>✓ Policy Driven Management</li> </ul>	<ul style="list-style-type: none"> <li>• Information Risk Assessment</li> <li>• Policy and Program Development</li> <li>• Infrastructure and Storage Hardening</li> <li>• HIPAA/HITRUST/HITECH, BASEL II, GLBA, NERC, PCI DSS, ISO27000</li> </ul>
 <p>Virtualization &amp; Private Cloud Security</p>	<ul style="list-style-type: none"> <li>✓ Security Assessment for Virtualized Environments</li> <li>✓ Securing VDI Environments</li> </ul>	<ul style="list-style-type: none"> <li>• Ensuring Secure P2V Migration</li> <li>• Virtualization Security Strategy</li> <li>• Securing Business Applications in a Virtualized Environment</li> <li>• Private Cloud Security</li> <li>• Policy Development</li> </ul>
 <p>Fraud Mitigation &amp; Identity Assurance</p>	<ul style="list-style-type: none"> <li>✓ Fraud Strategy and Assessment</li> <li>✓ Fraud and Identity Assurance Planning</li> <li>✓ Fraud and Identity Management</li> </ul>	<ul style="list-style-type: none"> <li>• Enterprise-wide and Channel Product Assessments and Strategies</li> <li>• Electronic and Traditional Fraud</li> <li>• Roadmap and Program Development</li> <li>• Managed and Subscription Services</li> <li>• Performance Review of Fraud Controls</li> </ul>
