

INTELLIGENT AND FULLY-AUTOMATED SAP SYSTEM COPIES

EMC helps you perform on-demand cloning of SAP production data without interruption

ESSENTIALS

The EMC-based partner solution, BlueSystemCopy from Empirius, together with EMC Replication Manager delivers:

- Integration to EMC Replication Manager
- Complete and accurate end-to-end automation of system copies
- Ability to copy ABAP, Java, and Doublestack systems
- High availability of up-to-date data for quality assurance and sandbox systems
- Integrated, tailored automation steps through user-exits during replication of the database and SAP preparatory and finalization input
- Integration with SAP procedures, e.g., SAP TDMS

In the administration of the complex and time-consuming process of an SAP system copy, two main issues are of the utmost importance:

- The quality of the copy must satisfy the most stringent requirements.
- The copy must be done fast.

For personnel involved in the preparation and execution of system copies, complexity and effort need to be reduced to an absolute minimum while assuring that the copy meets specification exactly.

THE SOLUTION

The EMC partner solution, BlueSystemCopy™ from Empirius, together with EMC intelligent cloning process based on EMC® Replication Manager, delivers a solution that successfully addresses the key issues of quality and speed.

Highest quality is attained through end-to-end, full automation of all laborious and error-prone preparatory and finalization work. These parts of the system copy execute flawlessly using BlueSystemCopy—without input from administrators.

BlueSystemCopy's automation, integrated with EMC Replication Manager and other EMC technologies like Snapshot, Clone, and Continuous Data Protection, drastically reduces the timeframe of the time-intensive restore of the SAP database. Using EMC's field-tested tools, the SAP system administrator can provide a system copy that meets the most stringent requirements and is tailored to the needs of any department—all in a matter of minutes.

QUALITY-ASSURED, EMC-BASED SOLUTION FROM BLUESYSTEMCOPY

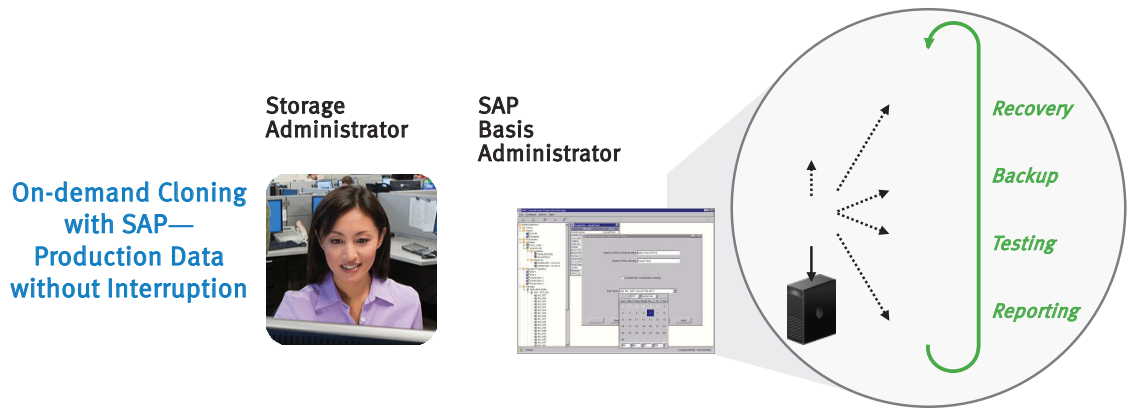

This proven solution, using tested and approved EMC technology, delivers:

- Optimal usage of available computer and personnel resources
- Reduction of TCO in the SAP domain
- Ad-hoc replication for sandbox, report, and look-up systems
- System copies for database refresh and quality assurance
- Increased speed of split-mirror backups

Customer benefits include:

- Complete and accurate end-to-end automation of system copies
- Ability to copy ABAP, Java, and Doublestack systems
- High availability of up-to-date data for quality assurance and sandbox systems
- Integrated, tailored automation steps through user-exits during replication of the database and SAP preparatory and finalization input (“the way you like it”)
- Integration with SAP procedures, e.g., SAP TDMS
